Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-23 have been rejected under 35 U.S.C. 103(a) as being unpatentable over non-Patent literature reference, Gram Faceting Designs (GFD) in view of Rosenberg, 5657646. GFD discloses a mixed cut diamond (step cut on the crown and brilliant cut on the pavilion. GFD's stone is octagonal in shape with corner crown lengths equal to corner side lengths and four table corner lengths equal to four table side lengths. The pavilion has a culet point with eight rib lines extending in a straight line from the girdle to the culet. The crown also comprises at least two steps with a flat table (see annotated figure). The number and shape of the facets on the pavilion as defined in the claims are shown in GFD.

The claims recite that the corner lengths of the crown and table are substantially less than the side lengths of the crown and table. GFD discloses the lengths to be the same.

Grossbard, 4020649, discloses a mixed-cut gemstone having corner lengths less than the side lengths of the table and crown.

The courts have noted that matters relating to ornamentation only, which have no mechanical function, cannot be relied upon to patentably distinguish the claimed invention from the prior art. *In re Seid*, 161 F.2d 229, 73 USPQ 431 (CCPA 1947).

The shape of the stone is considered to be ornamental and serves no mechanical function. Therefore, it would have been an obvious design choice to make GFD's stone into the shape of Grossbard's stone in order to change the aesthetical appearance of the stone.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
